Transformational Presence Leadership and Coaching: Evolutionary Awareness, Enlightened Action

Syllabus Overview

There are nine core fundamental areas of exploration and study in Transformational Presence Leadership and Coaching:

Four Levels of Engagement

There are four basic levels at which we engage life. Through the Four Levels we can learn to quickly identify clients' habitual approaches to life and immediately give them tools and understanding for choosing with intention and awareness how they will engage with life and leadership in the most productive and constructive ways.

Vertical and Horizontal Orientations to Life

There are two fundamental orientations to life: vertical and horizontal. These orientations help us understand our relationship to and balance between being and action, soul and ego, intuitive and intellectual minds, and many other aspects of life and work. Coaching from the Vertical and Horizontal Orientations helps clients find the balance between being and action that supports their greatest impact and accomplishment.

Daily Meditation / Reflective Practice

Tools for establishing a personal practice that supports you.

Engaging the Intuitive Mind

The intuitive mind is the larger mind, of which the intellect is just a small part. The more we operate as coaches and leaders from the larger intuitive mind, the greater access we have to wisdom, understanding, creativity, and innovation. From the perspective of the intuitive mind, we are able to understand and apply principles of energy and work from the "big picture" in any situation, circumstance, challenge, or opportunity. Intuition becomes a way of life and leadership.

The Soul-Ego Partnership

In Transformational Presence work, we understand the critical importance of a dynamic partnership between ego and soul.

Hermetic Philosophy

A basic understanding of the ancient wisdom teachings of Hermetic Philosophy and its principles provides a solid foundation as a coach for working with life and leadership as energy in motion. The seven principles are:

- The Principle of Mentalism—all is in all
- The Principle of Correspondence—as above, so below; as below, so above
- The Principle of Vibration—everything is energy in motion
- The Principle of Polarity—the answer is in the question
- The Principle of Rhythm—recognizing life and leadership as a dance
- The Principle of Cause and Effect—“as you sow, so shall you reap”
- The Principle of Gender—yin/yang and everything in its own time

Basic Principles of Quantum Physics

Building upon the foundation of Hermetic Philosophy, we then explore the basic principles of quantum physics for understanding of the science behind the Hermetic Principles and ancient wisdom teachings.

Human Energy System

A fundamental understanding of the chakra system and the spiritual and emotional attributes of each chakra gives the coach another strong foundation for understanding their clients' challenges. While you may or may not ever talk with your clients about these energy centers within us, your knowledge of them can inform your questions and understanding for how to support your client in the most effective and transformational way.

The Potential-Based Approach

In order to create a world that works, we must shift from a problem-solving approach to life and leadership to a potential-based approach. This means engaging life as energy in motion, always being aware of the emerging potential or “what wants to happen” for a greater good, and partnering with that potential to bring it to fruition. The Potential-Based Approach utilizes tools and concepts learned through the first eight core fundamentals to provide a powerful and breakthrough approach to transformational leadership and coaching.
